

## The Choice is Elementary.

- *Cost effective systems for retrofit or new construction*
- *Grows with your schools*
- *Non-proprietary system available*
- *Emergency voice evacuation*

Silent Knight is proud of their long history of serving the education community. In fact, our reputation as the fire alarm system for schools was built upon many satisfied customer experiences. Silent Knight offers a very wide range of products to meet the needs of your schools. Use the same fire alarm control panels for both large and small school systems, along with expanding facilities and growing campuses.

### Retrofits

Silent Knight systems can work with existing wiring from an old system, saving you the cost of rewiring your building.

## IFP-2000

- Top seller for school fire alarm system
- Networkable system grows with your school
- Highly reliable control panel reduces false alarms
- Flexible control programming enables faster system installation & testing
- School maintenance staff can do minor maintenance work like changing a smoke detector or a pull station

## IFP-2000VIP

Combine voice evacuation with the fire alarm system

- Protection for your assembly locations
- Intelligent fire alarm control integrated with an integrated voice evacuation system
- Powerful – all critical user interface controls are at the main panel
- Expandable system provides options

## IP Communicator

Use IP lines to monitor your fire alarm system, through either a central station or locally, and eliminate the cost of a telephone line.

- Adaptable to most systems
- Saves money
- More reliable and secure than phone lines
- Two options
  - IPGSM-DP - combines IP and GSM communication technologies
  - IPDACT-2 - uses IP as the primary communication method

## RPS-1000 / 5496

Addressable Power Supplies  
The intelligent way to distribute power throughout your facilities

- Cost effectively get power where you need it in your buildings
- Distributed power enables longer runs for notification circuits, increasing system capability
- Flexibility in system design due to intelligent power supplies
